1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$ . It is shown that the system of equations (1) has a solution for arbitrary values of the parameters  $\alpha$  and  $\beta$  if and only if the condition  $\alpha + \beta = 1$  is satisfied.

The first thing I noticed  
 when I stepped out of the car  
 was the smell of the sea.  
 It was a fresh, salty  
 breeze that seemed to  
 wash over me. I took a  
 deep breath and felt  
 a sense of peace. The  
 sun was shining brightly  
 and the water was a  
 beautiful blue. I walked  
 along the beach for  
 hours, feeling the sand  
 under my feet and the  
 waves crashing against  
 the shore.

I had heard that the  
 weather was perfect here,  
 and now I knew it was  
 true. The people were  
 friendly and the food was  
 delicious. I had found  
 exactly what I needed.  
 A place where I could  
 relax and enjoy the  
 simple pleasures of life.  
 The beach was my  
 sanctuary. I had found  
 my home.

I had been looking for  
 a place like this for so  
 long. A place where I  
 could escape the stress  
 of the city and the noise  
 of the world. A place  
 where I could be alone  
 and at the same time  
 feel part of something  
 bigger. The beach was  
 my answer. I had found  
 my home.

I had found my home.

At home, Sunday, 11th Nov.  
The weather was very fine  
and the children were  
very happy. We went  
for a walk in the  
park and saw many  
beautiful flowers.  
The children were  
very busy and  
enjoyed themselves  
very much. We  
went home and  
had a very good  
dinner. The children  
were very happy  
and we all enjoyed  
it very much.
